# Changing Diabetes®

Changing Diabetes® is a commitment to answer the needs of people with diabetes in every decision and action. This means delivering targeted treatments based on a deep understanding of individual needs, and doing so with financial, social and environmental responsibility.

By leading through collaboration with individuals, organizations and governments to drive prevention and provide holistic support, we will break the curve of the diabetes pandemic and empower people to live fuller, healthier lives until a cure is found.

Without significant change,

**BY 2030**

the number of people with diabetes globally will reach

**552 MILLION<sup>1</sup>**
