

Novo Nordisk in New Hampshire

Novo Nordisk US Bio Production, Inc., West Lebanon, was acquired in 2014 to help meet the organization's need to expand manufacturing capacity for biopharmaceutical products to meet anticipated future demands. It is part of the Novo Nordisk unit Biopharmaceuticals, Product Supply, which is run out of Denmark. Operators and technicians work various shifts around the clock depending on facility and production needs.

VISION FOR THE FUTURE

The facility will become a fully integrated part of Novo Nordisk's manufacturing production set-up. Currently, focus is on the manufacturing of a pipeline hemophilia product which is currently in phase III clinical trial, the last phase before possible application for approval of the product with the regulatory authorities. As part of Novo Nordisk's long-term plan, there are possibilities of using the facility to produce other new biopharmaceutical medicines from Novo Nordisk's development portfolio.

HISTORY IN NEW HAMPSHIRE

- Novo Nordisk has been part of the Upper Valley community since 2014.
- As part of the planning process, possibilities for acquiring existing manufacturing facilities were evaluated.
- It was determined that the plant in Lebanon, NH, is a highly qualified facility that fulfilled many of Novo Nordisk's needs.

IN THE COMMUNITY

Novo Nordisk has a strong tradition for supporting the local community and is committed to making a difference in the Upper Valley through support for local organizations and through our employees donating their time and skills to causes they care about. We have contributed to many local charities, including the American Diabetes Association.
