Novo Nordisk in New Hampshire

Novo Nordisk US Bio Production, Inc., in West Lebanon, New Hampshire, will expand the organization's manufacturing capacity for biopharmaceutical products. As part of the global biopharmaceutical product supply network, overseen from our company's headquarters in Denmark, the site's purpose is to meet anticipated future demand of our biopharmaceutical products. Operators and technicians work various shifts around-the-clock depending on facility and production needs.

A part of the Upper Valley community since 2014, Novo Nordisk's current facilities include a footprint of 195,000 square feet on 14 acres. The site hosts specialized and skilled employees and is a valuable asset in the Novo Nordisk manufacturing portfolio.

Hemophilia

SITE MILESTONES

In February 2019, the U.S. Food and Drug Administration (FDA) approved a product produced at the facility for the treatment of adults and children with hemophilia A. The facility also produces a growth hormone disorder product currently in a phase III clinical trial.

Vision for the future

The facility is underway to become a fully integrated part of Novo Nordisk's manufacturing production setup.

Currently, focus is on the manufacturing of pipeline hemophilia products and a growth disorder product, which are currently in clinical trials. As part of Novo Nordisk's long-term plan, there are possibilities of using the facility to produce other new biopharmaceutical medicines from Novo Nordisk's development portfolio.

Clinical research partnerships

We believe that partnerships, based on long-term commitment and mutual interest, are key to fostering innovation and bringing next generations of efficacious and safe medicines to our patients. In 2018 there were eight active Novo Nordisk-sponsored clinical trials conducted across ten sites in New Hampshire.

Sustainability

Novo Nordisk's focus is to be a sustainable business. The Triple Bottom Line (TBL) principle is anchored in the way we do business, ensuring that our decisions balance financial, environmental and socially responsible considerations while always keeping in mind the best interests of the patients we serve.

For the community

We are parents, colleagues, neighbors and friends—people living with the complexities of serious diseases. And we believe in the combination of science and soul to help nurture each other back to good health. We live this mission at Novo Nordisk every day to benefit patients, their families, as well as the broader community.

Novo Nordisk has a strong tradition for supporting the local community and is committed to making a difference in the Upper Valley through support for local organizations.

About Novo Nordisk in the U.S.:

Novo Nordisk, a global healthcare company, has been committed to discovering and developing innovative medicines to help people living with diabetes lead longer, healthier lives for 95 years. This heritage has given us experience and capabilities that also enable us to help people defeat other serious diseases, including obesity, hemophilia and growth disorders. We remain steadfast in our conviction that the formula for success is to stay focused, think long term and do business in a financially, socially and environmentally responsible way. With U.S. headquarters in New Jersey and production and research facilities in four states, Novo Nordisk employs around 6,000 employees throughout the country.
